

Dear Parent/Guardian,

As per the guidelines of Govt. of India the children have to be given deworming tablets (Albandazole) in the school. The tablets have to be chewed and taken after having a meal; therefore you must ensure to keep lunch with your child. These tablets are safe and have no side effects. If you are willing to administer these tablets to your ward, please fill the following consent form latest by Monday 19 Aug 2019.

Note: Students suffering from any disease/ going through any medication must not be allowed to take the tablets.

Regards

(Anurag Mathur)
Principal
