Class 2 Home- Work Assignment
English Language**

Do your written answers in your Language copy

Write a few lines about your best friend

Read the following passage and answer the Questions:

Spiders are small insects. Most of them are brown, grey or black. They have eight legs. Spiders are found all over the world. They like dark places such as cupboards and shelves. All spiders spin webs. Webs help them in many ways. Spiders like to lay their eggs in their webs. Webs hold the spider eggs. Webs also help spiders to hide and help them to trap food. Many people are afraid of spiders because some of them bite. But, spiders bite only if they think someone is going to harm them. Most spiders are harmless. They are helpful to people because they feed on insects like cockroaches and mosquitoes.

Please answer the following questions in your Language copy:

1. What kind of insects are spiders?
2. What are the three colours spiders are usually seen in?
3. Where can we find spiders?
4. How can a web help a spider?
5. How can a spider be useful to people?
