- 1) All of these
- 2) Website
- 3) All of these
- 4) You should send your pictures to anyone without asking your parents.(question was which is not correct)

Descriptive Answers 54/55 (Do in your computer note book)

- 1) A network is a group of computers connected together. Internet stands for Interconnected Network. It is huge network of computers around the world. These computers are connected to each other. Internet is used to share information.
- 2) In 1969, the department of Defence of the United States of America, set up a network of computers called the ARPANET(Advanced Research Projects Agency Network). It was started with one computer in California and three in Utah to share the information.
- 3) Viruses can attack our computer via the internet and harm the files. We can get a lot of unwanted emails which do not have any useful information for us. These are called spam or junk mails.
- 4) A web address is the address or location on the internet. All web addresses start with one of these http://www. The addresses of some interesting websites are :-

<http://www.pitara.com>

<http://www.dimdima.com>

<http://www.kids.discovery.com>

- 5) You must be aware of some safety tips while online; While chatting on the internet, especially with a stranger, do not send your picture or your personal data without asking your parents. Do not respond to any message that in any way make you feel uncomfortable.
