Answer these

1. Can you name these? Choose from houseboat, snowmobile, cable car and gondola.

Often used in mountains You may see these in Kerala. You will find these in Venice, Italy. This travels on snow.

Cable cars house boat gondola snowmobile

Activity Find out the different names by which auto-rickshaws are known in different parts of the world.

Write the following questions and answers in your s.st copy (if you have) or in your rough copy

Q1- What are vehicles and motor vehicles?

Ans- Those means of transport which move on roads are called vehicles and vehicles with engines are known as motor vehicles.

Q2- Give two reasons why water transport is useful for transporting heavy goods.

Ans- 1- Water transport can carry heavy goods which planes cannot carry

2- It is cheaper than air and land transport.

Q3- Helicopters are used to save people trapped in places that are hard to reach. Why?

Ans- Helicopters are used to save people trapped in places that are hard to reach because they can hover (stay at one spot) in the air and even fly backwards.

Q4- Name the following

1- A train which carry only goods such as coal, grains and oil - **goods train**

2- Two means of transport that run on tracks- **trains and trams.**

3- Another name of underground metro- **the Tube in London and subway in New York**

4-Two things used for the boats to make them go faster- **oars and sails**
