

Class 3 A and B

Subject- S.St

Chapter-17 (Natural resources)

Explained the chapter in the zoom class on 2 September.

Did the following exercises on 3 September

◇ Exercises ◇

A. Oral questions

1. What are natural resources? Things in nature like air and water that we can use
2. What harmful thing do motor vehicles and factories give out? - SMOKE
3. From what natural resource is paper made? wood
4. Name two things in smoke that make air dirty. Soot, harmful gases
5. How do plants help to keep air clean? - They take in carbon-di-oxide and give out oxygen
6. Name two natural resources that all living beings need. *
air, water

B. Fill in the blanks.

1. Water and air are natural resources.
2. The water found under the ground is called underground water.
3. Smoke has tiny unburnt pieces called soot.
4. Planting trees helps to keep air clean.
5. A dog that helps the blind walk safely is called a guide dog.

Write true or false.

1. When rivers become dirty, the animals living in them become ill. True
2. Smoke has harmful gases. True
3. Motor vehicles and factories give out oxygen. (smoke) False
4. Burning garbage is a good thing. (bad) False
5. Trees are cut down to make things like furniture and paper. True
6. Plants make food only for other living beings. *
(for themselves also) False

Answer these.

1. Why is water an important natural resource?
2. How do we waste water?
3. How do rivers, ponds and lakes get dirty?
4. How does air help us get food?
5. Write about three ways in which we can keep air clean.
6. Why should we save paper?

83

Write the following questions and answers in your s.st copy (if you have) or in your rough copy

Q1- How do we waste water?

Ans- We waste water when we forget to turn off a tap or let it run while brushing and washing , and by not fixing dripping taps and leaking pipes.

Q2- How does air help us get food?

Ans- Plants use carbon dioxide in air to make food. They use a part of the food they make and store the rest in fruit, vegetables and grains, that we eat.

Q3- Write about three ways in which we can keep air clean.

- Ans** 1) We should bury garbage, not burn it
2) We should plant more trees.
3) We should ask people not to smoke.

Q4- Complete the sentences.

- 1) We need water for drinking, cooking, bathing, cleaning and growing crops.
- 2) We use water from rivers, lakes and ponds.
- 3) The oxygen in air helps to burn things like wood, coal and gas.
- 4) The smoke from cigarettes harms the people around the smoker
- 5) The smoke from CNG vehicles is less harmful.
- 6) If your pet falls ill, take it to a vet.
- 7) A doctor for animals is called a vet.

8) Some people kill wild animals for fur, skin, and teeth

9) Be kind to animals and do not hurt or disturb them.

10)
